"I weave it all together into a single thread!"

Education

Kwangwoon University

B.S. IN ELECTRONIC COMMUNICATION AND ENGINEERING

- National Science and Technology Scholarship, Ministry of Science and ICT, 2019

Nowon, S.Korea

Mar. 2015 - Feb. 2021

Skills

DevOps AWS, Docker, Kubernetes, Jenkins

Back-end Spring Boot, Spring Batch, Spring Security

Front-end Vue.js

Programming C++, JAVA, Python, Javascript

Languages Korean, English

Experience

Samsung Electronics - Memory Business

BACKEND DEVELOPER & DEVOPS ENGINEER & DATA ANALYST

- Developed target sampling and inspection for assurance quality level based on material lots and module lots assembly records.
- Developed engineering tools for data analysis and integrated portal for internal users.
- Developed priority scoring function and implemented automated system into manufacturing processes.
- Built CI/CD pipelines with jenkins and real-time monitoring systems.

Hwaseong, S.Korea

Jun. 2023 - Present

Samsung Electronics - Innovation Center

PROJECT MANAGER & PROJECT INNOVATION

- Project Manager for the development of Samsung Electronics' industry-academia collaboration project management system.
- Inspected entity schemes of domain and data interfaces between application and database.
- Built CI/CD pipelines with jenkins, ansible, and nexus.

Hwaseong, S.Korea

Mar. 2021 - Jun. 2023

Extracurricular Activity

Code Review Agent Group

MEMBER

- Samsung Electronics internal code review activities.
- Clean code conventions committee for Quality Assurance Team 2.
- Test driven development and Refactoring review activities.

S.Korea

Jun. 2024 - PRESENT

SSAFY (Samsung SW Academy For Youth)

MENTOR

- A program that provides Samsung's software training courses to provide job seekers with software skills enhancement education.
- Seminar presentation about backend developer career path and tips for problem solving skills.

S.Korea

Mar. 2024 - PRESENT

AlgoWarrior

LEADER

- A study group of problem solving with algorithms with C++ and Python.
- Deep dive into data structure implementation and STL without any libraries.
- Got Platinum V level in online judgement site, BAEKJOON.

S.Korea

Mar. 2023 - Mar. 2024

PANGTUDY

MEMBER

- A study courses for Book, Modern Java in Action.
- A project group of building study planner application based on Spring Frameworks.
- Built file transmission APIs and designed entity schemes for user management.

S.Korea

Jun. 2021 - Feb. 2022

2019 Naver A.I Hackathon - Speech

S.Korea

FEATURE ENGINEERING

Sep. 2019 - Oct. 2019

- Ranked 12100 in Korean speech recognition competition hosted by Naver Corp.
- Recorded model performance of 24.67% CER (Character Error Rate)
- Feature engineering generating mel-spectrogram inputs with various options as window type, length and silence cutting techniques.

Scholarships & Awards

SCHOLARSHIPS

2019 **National Science & Technology Scholarships**, Ministry of Science and ICT, Spring Semester

Seoul, S.Korea

2015 **Academic Excellence Scholarship**, Kwangwoon University, Fall Semester

Seoul, S.Korea

AWARDS

2019 **Excellence Award**, 5G-based ICT Convergence Service Idea Contest - KICS, SKT
